

CAREER PROFILE

"A technology enthusiast seeking to merge his creativity with innovation."

I am an attentive, resourceful person with great critical thinking skills. Since I was a child I have been fascinated by technology, but without forgetting my other great passion: music. In fact, I have combined both by creating personal projects that merge these two worlds. My experience in orchestras has allowed me to develop an excellent technique of group coordination, assuming both leadership and collaboration roles.

Among my strengths, I would say that I stand out for my desire for continuous learning. My career has allowed me to acquire knowledge in various technologies, approaches and methodologies, which has made me a resourceful person in the face of any problem.

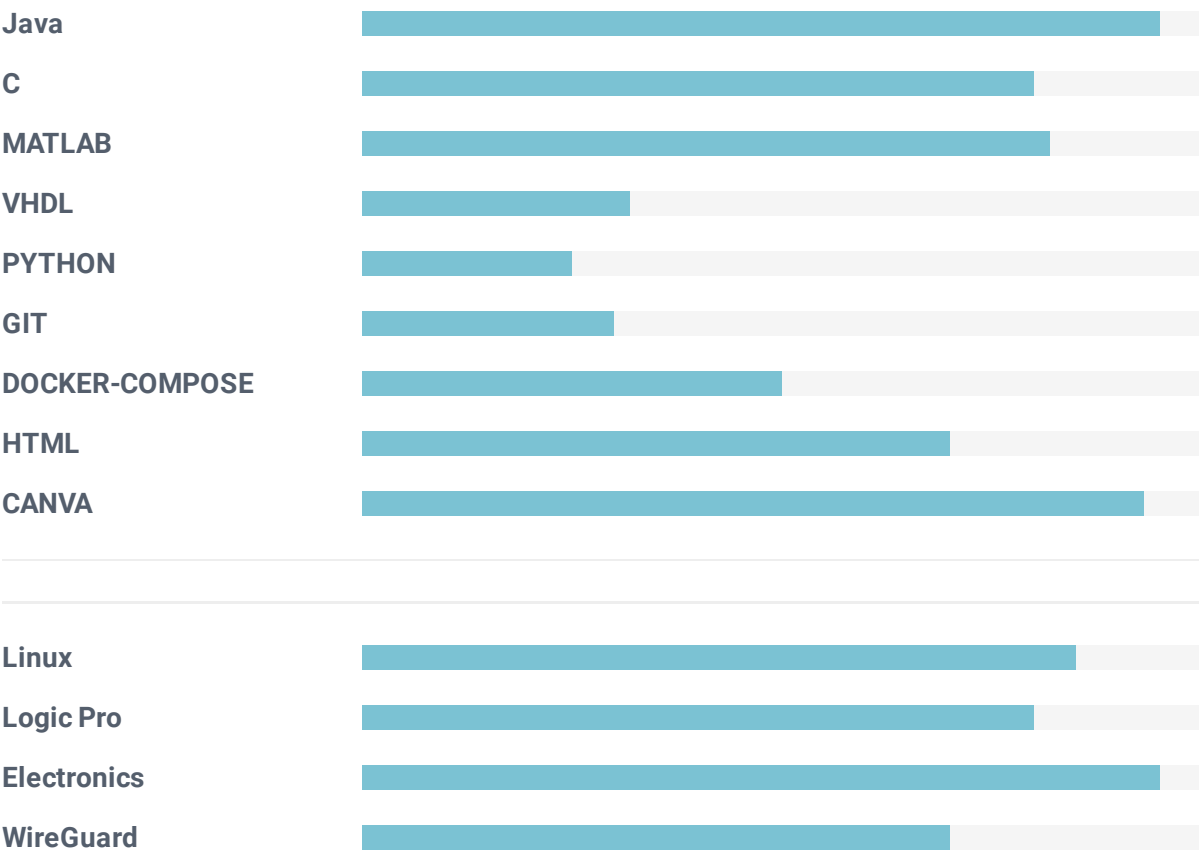

I am aware that there is always room for improvement. I am working on trusting my decisions more and not relying so much on external validation. My goal is to find a balance between individual responsibility and effective collaboration.

I consider myself a proactive, creative person with great adaptability. I am excited about the possibility of contributing my skills and knowledge to a dynamic and challenging team. I am sure that I can make a significant contribution to the success of any company that gives me the opportunity to grow and develop professionally.

SKILLS & PROFICIENCY

OTHER TECHNOLOGIES AND EXPERTISE

EXPERIENCES

Committee for Recruitment and Technological Vocations
CEET - Consejo Estatal de Estudiantes de TelecomunciaciónSeptember 2024 - Present

- Colaborative working
- Train new members
- Promote telecommunication technologies
- Team-building activities
- Offer adaptive support

The CEET is an organization that represents telecommunication students from all over Spain. Our goal is to safeguard the interests of students in this field, both in academic and professional matters.

My role within the Commission for Technology Promotion and Vocational Guidance focuses on attracting new members to the community by initiating and maintaining contact with representatives we believe may be interested in the project. However, we have several open fronts that we believe will be very fruitful, such as offering training related to our field to high schools to raise awareness of the importance of telecommunication technologies.

Workshop Assistant
INTRESS - CRL Puente de VallecasJune 2024 - September 2024

- Assesment of users' initial competencies
- Individual tracking
- Tailoring to the needs of each user
- Basic tasks with ICT
- Vectorial edditing programmes
- "Canva" like projects

The Labour Rehabilitation Center (CRL) of Puente de Vallecas aims to seek job placement with guarantees for the users who attend it.

My contributions focused on the Labour Adjustment Workshops, specifically in the "new technologies" workshop; a project consisting of 14 sessions in which we start from scratch and aim for users to master basic skills such as: using instant messaging applications (WhatsApp), taking photographs, writing and sending emails with an appropriate structure, browsing the internet, searching for addresses and following routes (Google Maps), creating attractive presentations using "Canva" like tools or signing documents electronically.

Violinist
Orquesta Escuela Centro Musical Serra2012 - 2024

- Teamwork
- Discipline
- Commitment
- Aaptability
- Leadership

The School Orchestra of the Serra Musical Center aims to develop activities that complement the musical training received at the center, both pedagogically and artistically.

I joined as the last stand of the second violin section and, over time and with my effort, I climbed positions to become the first stand of the section, with the coordination of all group members being my primary responsibility. It was then that I learned the value of group communication and the benefits of creating dynamic work environments open to opinions.

Later, I moved up to the first violin section, becoming once again just another link in the chain. I learned a lot from the working methods of the people who then led the team. Finally, after years of dedication, I was appointed Concertmaster of the orchestra, the position of greatest responsibility after that of the conductor. I faced tasks such as coordinating not just one section but the entire orchestra (about 10 sections in total), leading the team when the conductor was absent, and providing critical feedback on the work we were doing as a team.

ACHIEVEMENTS (CERTIFICATIONS, COURSES, TALKS)

- IX JFET - Week for the Promotion of Telecommunication Studies - Cuenca, 2024
- XXXY CEET - Telecommunication Studies Congress - Las Palmas de Gran Canaria, 2024
- CyberCamp - UC3M, 2023
